

# Academy of Model Aeronautics 2022 Annual Report

## Executive Summary

For the past four years, AMA published an Annual Report. The Annual Report highlights the many accomplishments of the Academy over the previous year. In 2019 we showcased new marketing efforts to grow the hobby. In 2020 we celebrated how our community rallied together during COVID. The 2021 Annual Report featured the generosity of our members and their contributions. The 2022 Annual Report is packed with numerous victories for the hobby as well as new initiatives for our clubs.

Throughout the 2022 Annual Report, you'll notice new programs and features to support and grow our 2,500 clubs and flying fields across the country. We introduced new club award and recognition programs, a more robust flying field search tool, and created more tools for club officers including an improved online club roster and new online club chartering. In 2022, AMA also started the process to earn our clubs FRIA status so clubs can continue operating without the need for Remote ID equipment.

All members will also benefit from new projects released in 2022 including AMA digital cards, revisions to our communication strategies, and of course our advocacy wins including earning the status as a Community-Based Organization!

Thank you to the staff, Executive Council, and volunteers for another successful year. Most importantly, thank you to the members for your continued support to grow the hobby. AMA's Vision Statement includes a commitment for "continuous improvement." We look forward to continuing to improve and grow the hobby in 2023.

## AMA's Mission

The Academy of Model Aeronautics is a world-class association of modelers organized for the purpose of promotion, development, education, advancement, and safeguarding of modeling activities.

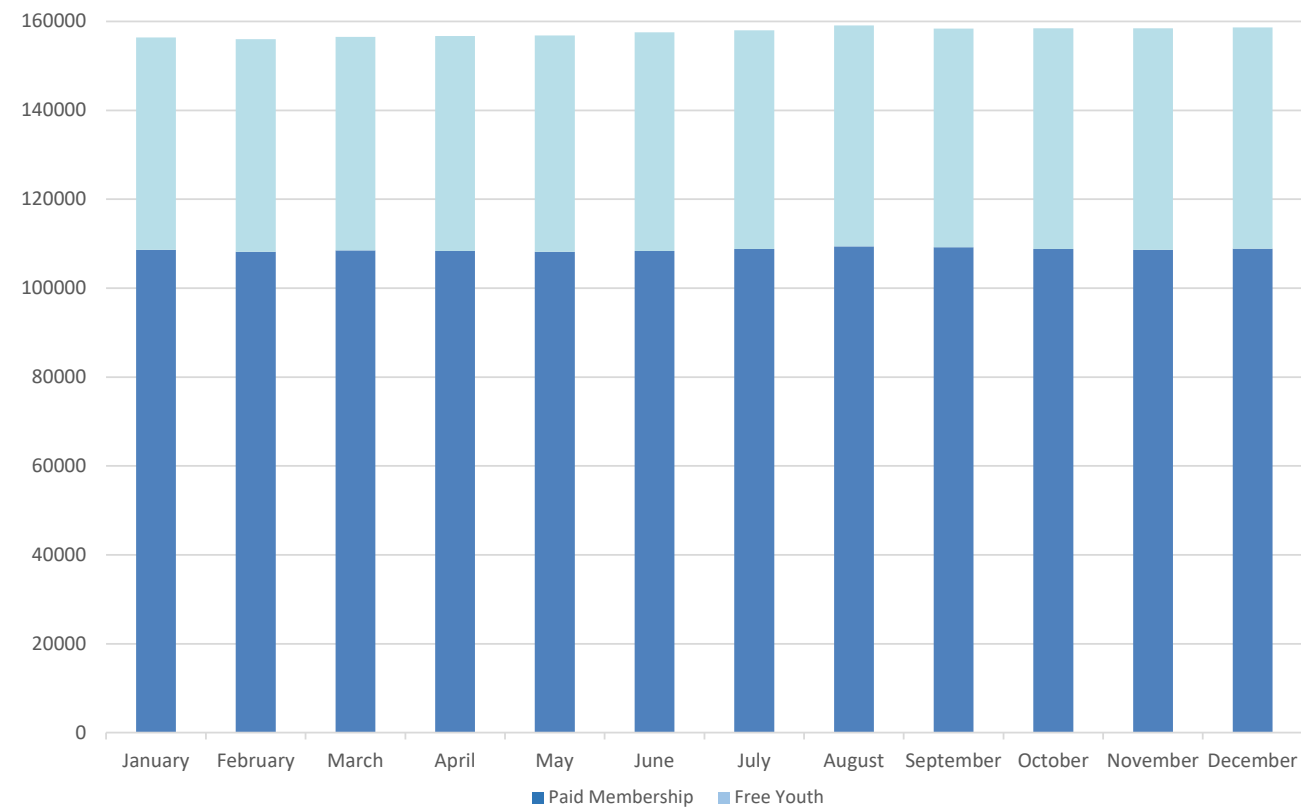

The Academy provides leadership, organization, competition, communication, protection, representation, recognition, education, and scientific/technical development to modelers.

# The Nation's First Community-Based Organization

2022 marks the culmination of 12 years of work to earn AMA the designation as a Community-Based Organization (CBO). CBO recognition is important for the growth of the hobby for many reasons. This validates and gives credibility to AMA's 87 year safety program among stakeholders and regulators. Although AMA has been shaping regulations for decades, CBO status mandates that the FAA collaborate with AMA when considering updates to recreational regulations and policy. This designation opens the door to additional advocacy efforts to include applying for FAA-Recognized Identification Area (FRIA) status and higher altitudes for our clubs' flying sites. Join us in celebrating this milestone!

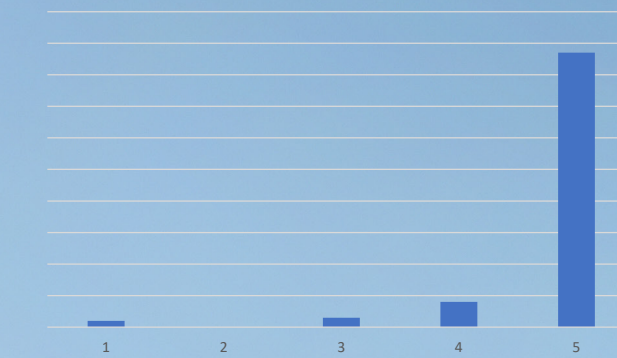

## Consistent and Steady Membership in 2022

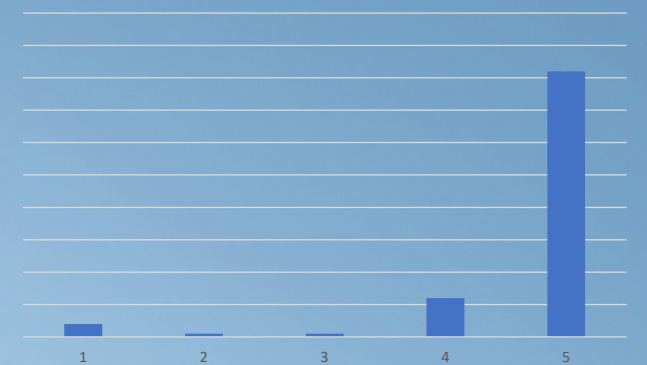

## Member Services Receives High Marks

Members are frequently asked to fill out a membership service survey after contacting AMA Headquarters. Below are highlights from our member services survey.

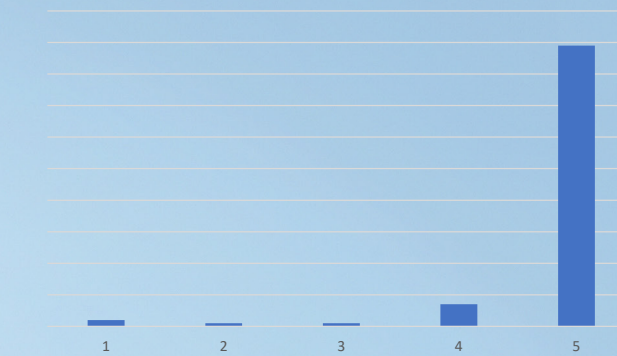

On a scale of 1-5, with 5 being the highest, how satisfied were you with the overall quality of service?

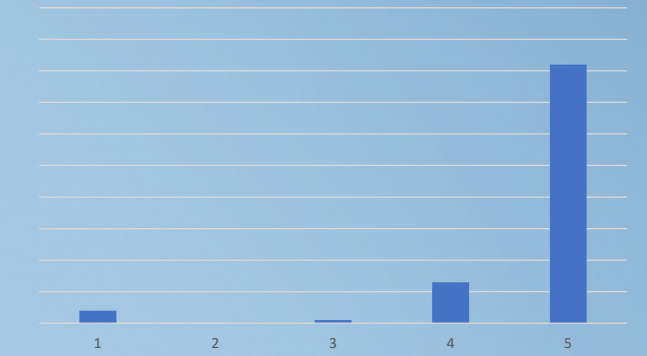

On a scale of 1-5, with 5 being the highest, how responsive was your membership representative?

On a scale of 1-5, with 5 being the highest, how knowledgeable was your membership representative?

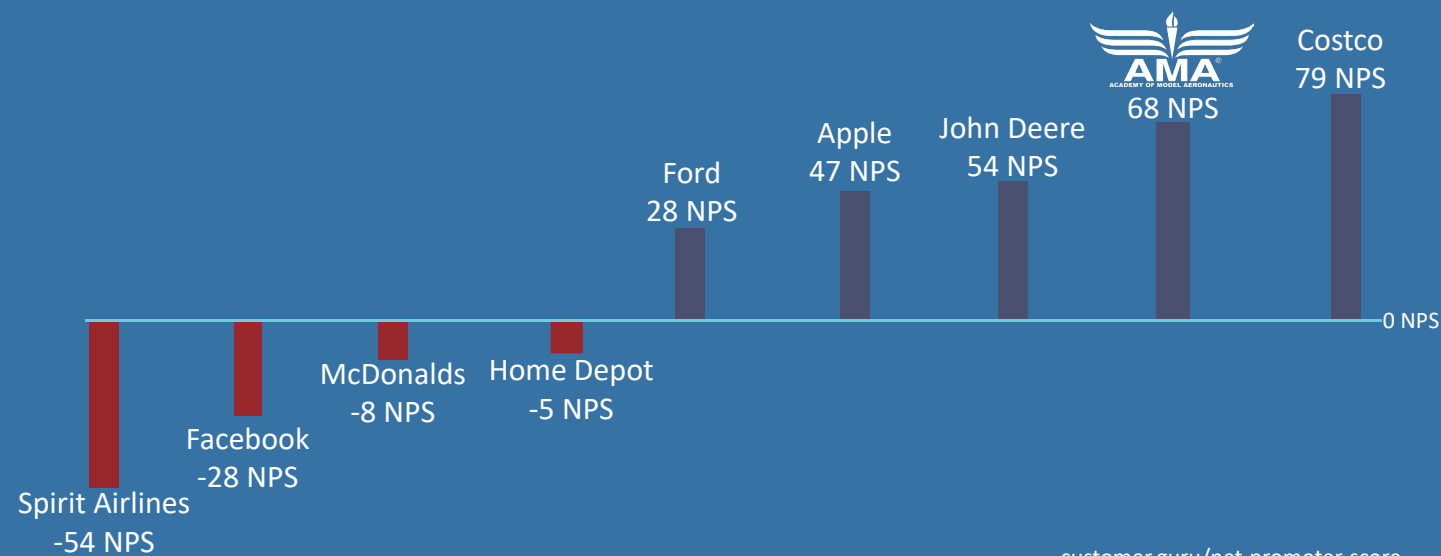

On a scale of 1-5, with 5 being the highest, how well was your issue resolved?

Membership Customer Service Survey Jan. to Dec. 2022

## AMA Ranks High Among Members

Using the widely adopted industry standard Net Promoter Score (NPS), AMA consistently received a high satisfaction score. A NPS can range from -100 to 100; the higher the number, the higher the satisfaction rating. While there is always room for improvement, on average AMA earned a 68 NPS. Below is a comparison of how AMA's NPS compares to other companies and organizations.

customer.guru/net-promoter-score

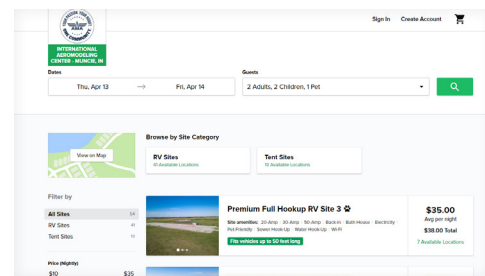

## Member Competition, Events, and Recognition

Members participated in thousands of national and international events and competitions. AMA was able to advocate for model aviation to be included in the World Games 2022. The World Games is under the patronage of the International Olympic Committee.

Nearly 1000 new Contest Directors, Event Managers, records, awards, turbine waivers and other credentials were issued including a proclamation (left) declaring March 3, 2022 as National Hazel Sig Admiration Day.

At the request of members, in 2022 AMA launched an online camping reservation system at the IAC. Now when members visit the IAC for an event they can book their camping site in just a few clicks.

### National Fun Fly

AMA hosted the third annual National Fun Fly. This three-day event included multiple flightlines safely spread across the IAC and a membership meeting. The 2023 National Fun Fly is scheduled for June 23-25. Learn more at [modelaircraft.org/funfly](http://modelaircraft.org/funfly).

## AMA Members Receive Highest Aviation Award

The NASA/JPL Ingenuity Mars Helicopter Team has been selected as the recipient of the 2021 Robert J. Collier Trophy. Among the award recipients are AMA members including Matt Keennon and his coworkers at AeroVironment, Inc., who helped design and test the helicopter that has successfully flown on Mars several times. Matt, in addition to some former AMA members and/or model builders, used some of what they learned through the hobby to design and test the helicopter. AeroVironment, Inc. was hired by NASA/JPL at the California Institute of Technology to develop the helicopter.

The National Aeronautic Association (NAA) announced that the team won the trophy for "... the first powered, controlled flight of an aircraft on another planet, thereby opening the skies of Mars and other worlds for future scientific discovery and exploration." AMA joined Matt and the team during an award ceremony June 9, 2022, in Washington, D.C.

The Robert J. Collier Trophy, the highest aeronautics and astronautics honor, has been presented since 1911. It is awarded for "... the greatest achievement in aeronautics or astronautics in America, with respect to improving the performance, efficiency, and safety of air or space vehicles, the value of which has been thoroughly demonstrated by actual use during the preceding year." Robert, who established the award, was a publisher and early president of the Aero Club of America. The trophy is administered by the NAA and is on permanent display at the Mary Baker Engen Restoration Hangar at the Steven F. Udvar-Hazy Center in Chantilly, Virginia.

The Robert J. Collier Trophy has been awarded to a handful of AMA members throughout the years to include Elbert "Burt" Rutan, Dr. Paul MacCready, and astronaut Neil Armstrong.

# New Member Communication Strategies

AMA sends out nearly 16 million emails a year to our members. While these emails are full of helpful information, it can be overwhelming. In an effort to help our members, AMA completely retooled our newsletter communication strategy. In June 2022, members began receiving AMA This Week, a weekly newsletter that highlights AMA and industry news. This singular weekly newsletter reduces member email fatigue and is customized to a member's interest. For example, members who have an interest in Control Line will receive more Control Line content in their AMA This Week newsletter. Members can update their interests by logging into modelaircraft.org and editing their membership information on their profile page.

You're receiving this email because of your affiliation with the Academy of Model Aeronautics.

**Team USA Competes in Romania**  
 National Free Flight Society (NFFS) President David Lindley has started a blog following the road to the FAI F1D World Championships for Indoor Model Aircraft in Romania this month. Follow Team USA as it reaches for the gold, and meet indoor Free Flight competitors from around the world.

**June**  
Dare County RC Flyers

**November**  
Chino Valley Flyers

**December**  
DC Radio Control Club

## Club Officers Receive More Online Resources

One of the most ambitious initiatives by AMA this year was the launch of the online AMA club management portal. This portal allows club officers to update their club roster, review member expiration dates, edit club officers, add introductory pilots, update associated flying sites, renew the club charter, and renew club insurance certificates all online. This feature is only available for club officers at [modelaircraft.org/charter-renewal](http://modelaircraft.org/charter-renewal).

## New Online Club and Flying Site Search

AMA restructured the online club and flying site search portal for our members and clubs. This endeavor required updates to our database management to allow members to expand their search capabilities when looking for a club flying sites. Members can now search using a combination of the following criteria.

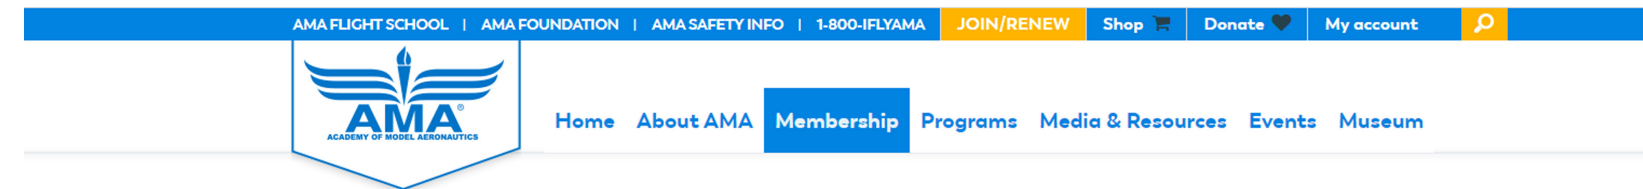

**Activities Permitted:** Members can search for flying sites that are set up for their interest whether that's turbine jets, rockets, control line, or even surface models such as RC cars.

**General Info:** Members can select amenities such as whether a flying site includes electric power or restrooms as well as the type of runway.

**Club Intro Pilots:** New hobbyists can look for clubs that have include Introductory Pilots.

**Club Details:** This field allows members to identify clubs that include youth programs or spectators.

**Club Level:** Members now have the ability to identify Gold, Silver, or Bronze leader clubs.

## AMA Club / Flying Site Search

Enter location information to find your nearest clubs. You may also further filter the results by choosing one or more attributes of flying sites including activities permitted, general info, or restrictions. Club filters may also be chosen, to include club details or clubs participating in the intro pilot or leader club programs.

# New Club Awards and Recognition Programs

**AMA Chartered Club Recognition**

In the mid-1960s, AMA established a program that gave local AMA members the opportunity to join together as a group, enjoy camaraderie, exchange modeling tips and tricks, and secure use of flying sites. This was structured under the concept of organized groups, which are identified as AMA Chartered Clubs. Today AMA charters nearly 2400 clubs throughout the United States. AMA offers a variety of programs and benefits to chartered clubs such as flying site assistance and disaster relief grants, media recognition rewards, and liability coverage for officers and flying site owners to name just a few.

**ANNIVERSARY AWARD**  
Model Aviation clubs have been part of the fabric of the hobby since the early 1900s. This program is designed to celebrate clubs that have been operating for decades. Do you know a club that qualifies?  
[APPLY NOW >>](#)

**AWARD OF EXCELLENCE**  
The Award of Excellence is the highest level of club recognition that can be given to an AMA chartered club.  
[Contact your District VP to learn more >>](#)

Clubs are critical to the growth of our hobby. In the mid-1960s, AMA established a program that gave local AMA members the opportunity to join together as a group, enjoy camaraderie, exchange modeling tips, and secure the use of flying sites. To build upon our program, AMA launched new club programs and awards to support our clubs. By visiting [modelaircraft.org/clubs](http://modelaircraft.org/clubs) members can learn about AMA's existing club support programs as well as new initiatives to include the Club Anniversary Award.

## AMA Begins Securing Clubs FRIA Status

Thanks to AMA's efforts, one way to comply to Remote ID is to fly at an FAA-Recognized Identification Area (FRIA). AMA members at a FRIA will be able to fly their existing model aircraft as they always have without the use of a Remote ID broadcast module. This year AMA formally began collaborating with clubs to grant their flying sites FRIA status.

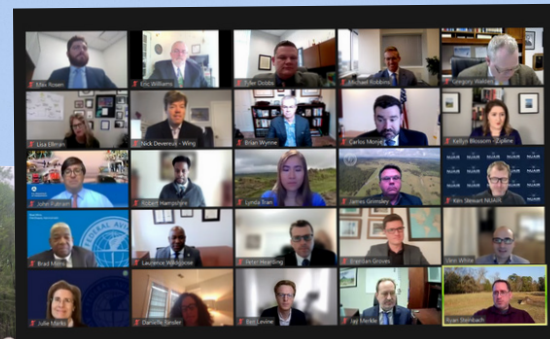

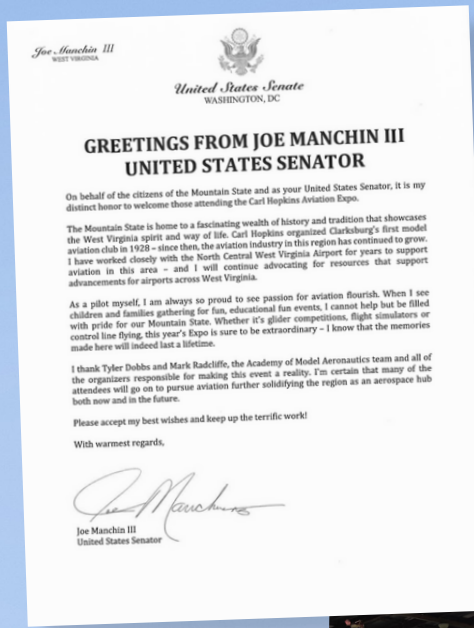

This will be lengthy process that will continue well into the fourth quarter 2023. While this process is expected to take about 3,500 staff hours to complete, this is a complimentary service to support our clubs and grow the hobby. Club officers are encouraged to monitor their emails and contact the AMA clubs department to learn more about the FRIA process.

Model aviation clubs have been part of the fabric of the hobby since the early 1900s. Clubs who achieved 25, 50, 75, or 100 year anniversaries can receive a Certificate of Club Anniversary Award signed by the the club's AMA District Vice President and AMA President. Please visit [modelaircraft.org/programs/clubs-anniversary](http://modelaircraft.org/programs/clubs-anniversary) to nominate a club for an anniversary award.

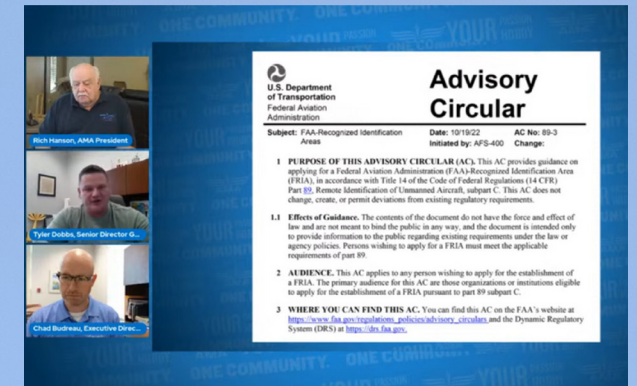

# Advocating for Our Clubs, Members, and Hobby

AMA continues to connect with and educate policy makers, the Department of Transportation, Department of Defense, and the FAA on the nuances of our hobby. In 2022, AMA hosted congressional staff and FAA representatives to club fields across the country. To the left is a letter Senator Machin wrote AMA regarding his support of the hobby. Below and center is a photo of AMA hosting the FAA at a local club near Washington DC. To the bottom right is a photo of AMA participating in an FAA and DOT policy session.

AMA worked to insure FAA Advisory Circulars (AC) 91-57C and AC 89-3 were favorable to the hobby. When the ACs were issued in 2022, the AMA leadership and government teams held live roundtables to prepare members on what to expect from the ACs and the positive impacts to the hobby.

AMA helped multiple clubs achieve higher altitudes within controlled airspace through FAA's Safety Risk Management (SRM) process. AMA worked with and advocated with each club to ensure members will be able to operate at higher altitudes.

*"Keep in mind if your club is requested to participate in an SRM meeting, you are not alone; the AMA will be there to help."*  
- Thomas, 107th RC Flyers

*"With panel recommendations implemented into the new LOA, AMA flying sites will improve airspace safety. The HOTMAC outcome was very favorable as the panel allowed our altitude to be restored back to 1,500 feet."*  
- Stephen, Heart of Texas Miniature Aircraft Club (HOTMAC)

# AMA Launches Digital Cards for Members

Members can now log into their [modelaircraft.org](http://modelaircraft.org) profile to view, print, and save their AMA membership card. This feature is available for all membership types. The digital cards display live data and all credentials associated with the member. A member can save the card as a PDF, print it in color or black and white, and even display a mobile friendly version. Digital cards are great for members who forgot their card at an event or flying field, who prefer digital over traditional media, and for members wanting to display a card with the most current credentials, such as an updated expiration date or new credential such as becoming a Contest Director. All members will continue to receive a print card in the mail with their membership.

# AMA Inspires the Next Generation

AMA partnered with the Experimental Aircraft Association (EAA) to encourage building among youth. Dozens of AMA clubs and EAA chapters conducted building sessions with youth across the country.

AMA introduced model aviation to tens of thousands of youth including at AMA Camps, virtual camps, STEM competitions. In 2022, the FAA partnered with AMA to provide curriculum and introduce aeromodeling to 2,500 additional classrooms nationwide.

All October, AMA promoted plans-building, scratch building, and kit building in social media, online, via email, and in *Model Aviation*. The October build issue of *Model Aviation* included dozens of build articles and columns with topics ranging from building with carbon-fiber tube to building your first kit.

# Member Generosity

The AMA Foundation continues to grow and provide more funding for AMA programs each year. Thanks to the following members who made a contribution to the AMA Foundation.

Note: This list represents every donor who gave in 2022 and their current donor recognition level (bronze, silver, etc.) based on their cumulative gifts. The Heritage and Legacy Society Members are Lifetime Members, so those lists represent any donor who has reached those levels, regardless of whether or not they gave in 2022.

PENDING DATA

# Year in Review 2021

PENDING DATA

Because of AMA Jr. Camp, participants reported in a post-camp survey that they had an increased interest in model aviation as well as increased interest, confidence, and awareness of STE(A)M principles.

"[My son] enjoyed the videos and learned a lot. Overall, this was an excellent experience, and we would definitely want to visit the museum this summer to learn more!"

## 2022 Operating Income and Expenses

AMA worked to offset rising costs, inflation, labor shortages, and negative stock market returns. AMA renegotiated many contracts and pursued new revenue opportunities through grants, sponsorships, and other non-dues opportunities. Below is summary of the 2022 operating financials. You can read the full AMA financials and audit report in the members only section of [modelaircraft.org](http://modelaircraft.org).

Academy of Model Aeronautics  
 5161 E. Memorial Dr.  
 Muncie IN 47302
